

YEAR SIX

Dereham
Church of England
Junior Academy

Blood, Sweat and Tears

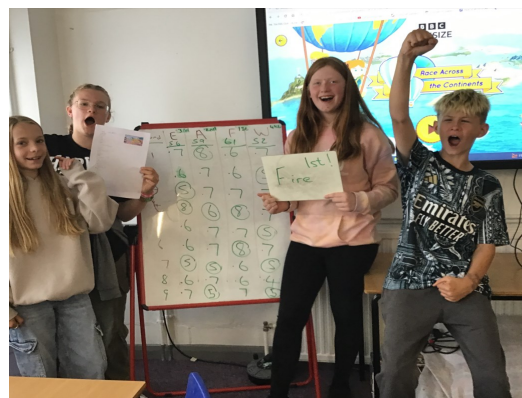

Coming back fresh from the half term break, year 6 have thrown themselves into this term's topic learning about how the heart and circulatory system work. They've made models of blood flowing around the body, looked in microscopic detail at what blood is made of and how it 'feeds' our vital muscles and organs. This led onto learning about healthy lifestyles and how our bodies react to good food and exercise as well as how it reacts when we make unhealthy choices. We've had a transition workshop and enjoyed wearing rainbow colours to support the friends raffle.

Race Across The World House Competition

This week saw the first round of The Big Geography House Quiz.

Year 6 teams battled it out and by a few points only, the win was secured by

the Fire Team. Well done to them.

Coming up....

Monday 17th June -Kooth Workshop - introduction to this resource for children.

Tuesday 18th June - 4 till 6 Dereham Library Extraordinary extinct activity workshop.
